AIRCRAFT SIMULATOR TEAM BUILDING

Building Resilience, Agility
and Cohesion In Your Team

OVERVIEW

We use the most advanced flight cabin simulators in the world to create highly realistic team experiences designed to test a team's ability to succeed in testing environments.

This gives your team the opportunity to experience unpredictable, ever changing challenges that requires them to think quickly, communicate effectively and work well together under pressure.

This experience becomes the basis for team-level coaching from which the team creates their own action plan to help them work more effectively together.

[CLICK HERE TO SEE THE EXPERIENCE IN ACTION](#)

WHAT YOUR TEAM WILL EXPLORE

- Handling unpredictability
- Dealing with change
- Working collaboratively to solve problems
- Communicating effectively under pressure
- Developing team spirit & ethos
- Creating actions & protocols to build a better team

AVAILABLE AS A HALF DAY
OR FULL DAY PROGRAM

TEAM-LEVEL COACHING OUTCOMES

We use team-level coaching methods in order to draw out the lessons from the experience in a highly impactful and memorable way. This follows a 3 stage process:

EXPERIENCE: Creating a very realistic experience for the team to feel what it's like working as a team in pressured, unpredictable environments.

RELEVANCE: Our coaching debrief establishes the relevance of this experience, consciously connecting the outcomes and lessons to the realities of the team's existence.

ACTION PLAN: We then help the team to create their own unique action plan based upon their learning from the experience so they can develop and grow stronger as a team – a plan they then hold themselves accountable to as they carry it out back at work.
